DETAILED ACTION

Election/Restrictions

Applicant's election of Species A (fig. 1) is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 5, 6, 12 and 18 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species A (fig. 1), there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7, 9-11,13-17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson (3949510).

As to claim 1, Johnson discloses a handle, a body which is a tube having a first and second end (fig. 2).

As to claim 2, disclosed is at least one opening (fig. 6).

As to claim 3, disclosed is plastic.

As to claim 4, disclosed is the device being opaque.

As to claim 7, disclosed is plastic.

As to claim 9, disclosed is a non-slip feature.

As to claims 10, 11, 13-17 and 19, disclosed are the limitations of the instant claims (fig. 2 and 6).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson (3949510).

As to claim 8, not disclosed is a single part. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the device of a single part, since it has been held that forming in one piece an article which was formerly been formed in two pieces and put together involves only routine skill in the art.
